

EDP Renewables Canada Ltd.  
1320B-396 11th Avenue SW  
Calgary, Alberta T2R 0C5

February 2, 2017

Dear Neighbour,

I am following up after our first newsletter sent in late January to provide you with some further updates about the Sharp Hills Wind Farm (the Project) and let you know that we will be in the community in early February to consult with you on the Project. A brief introduction to our new consultation team members is included in this letter.

Accompanying this letter are three documents that will give you further information on our team and the Project:

- An updated Project map that includes indicative turbine locations
- Information about our new Calgary based office location
- The Alberta Utilities Commission (AUC) Brochure — *Public Involvement in a Proposed Utility Development*

You can expect to see our Consultation team members within the Project area over the next few weeks as they distribute information and conduct meetings with local stakeholders as part of the Participant Involvement Program (PIP) for the AUC application. Our Consultation team travels in pairs for reasons of safety in the Alberta winter. Should you have any questions for any of the team members, please get in touch through the contact information below.

Also, while we are a long way from finalizing the project layout, we have added an updated Project Map with indicative turbine locations in this newsletter. It should be noted that these locations will change as we conduct additional noise, environmental and wind resource studies in the spring. We would be happy to discuss your feedback about all the Project information we have sent so far.

We also wanted to remind you about the first community open house that is coming up on **Wednesday, February 15, 2017 from 5:00 to 9:00 p.m. at the Sedalia Hall, 1st Avenue, Sedalia, Special Area 3, Alberta.** We hope to see you there!

### **Come visit us in our new office**

We've set up a new office location in Calgary at 1320B-396 11th Avenue SW, Calgary, Alberta T2R 0C5. Our team will be based out of the Calgary office but will be in the Project area chatting with you about the Project over the coming weeks.

## Meet our consultation team

**Sarah Aftergood, *Consultation Team Member***

Sarah grew up in Calgary and formerly worked for Nexen Energy before joining EDP Renewables at the end of 2016 as a Project Manager out of our Houston, USA office. Just as she thought she had escaped another frigid Alberta winter for sunny Texas, we have called her back home to assist with Sharp Hills.

**Wendy McMillen, *Consultation Team Member***

Wendy is one of EDPR North America's longest serving employees, with a 13 year tenure with the company. She grew up in Washington state and works out of EDPR's Portland, USA office. Wendy has worked with all of the different departments within the company and has a deep and thorough understanding of how EDPR operates across North America.

**Darren Carl, *Project Developer***

Darren joined EDP Renewables Canada Ltd. (EDPR) in 2016. He has been working in the renewable energy industry for over six years. Darren supports day-to-day project tasks from EDPR Canada's Toronto head office, while making regular trips to site to work with the community and stakeholders.

**Ryan O'Connor, *Project Manager***

Ryan moved from New Zealand to Canada just over four years ago and joined EDP Renewables Canada Ltd (EDPR). He has been involved with the project since 2013. He recently set up an office in Calgary and has visited the site numerous times.

If you are unable to attend our public open house or would like to speak to one of our consultation team members, please contact us directly at **1-844-624-0330** or **canada.ab@edpr.com**. For additional information on our project, please visit our website at **www.sharphillswindfarm.com**.

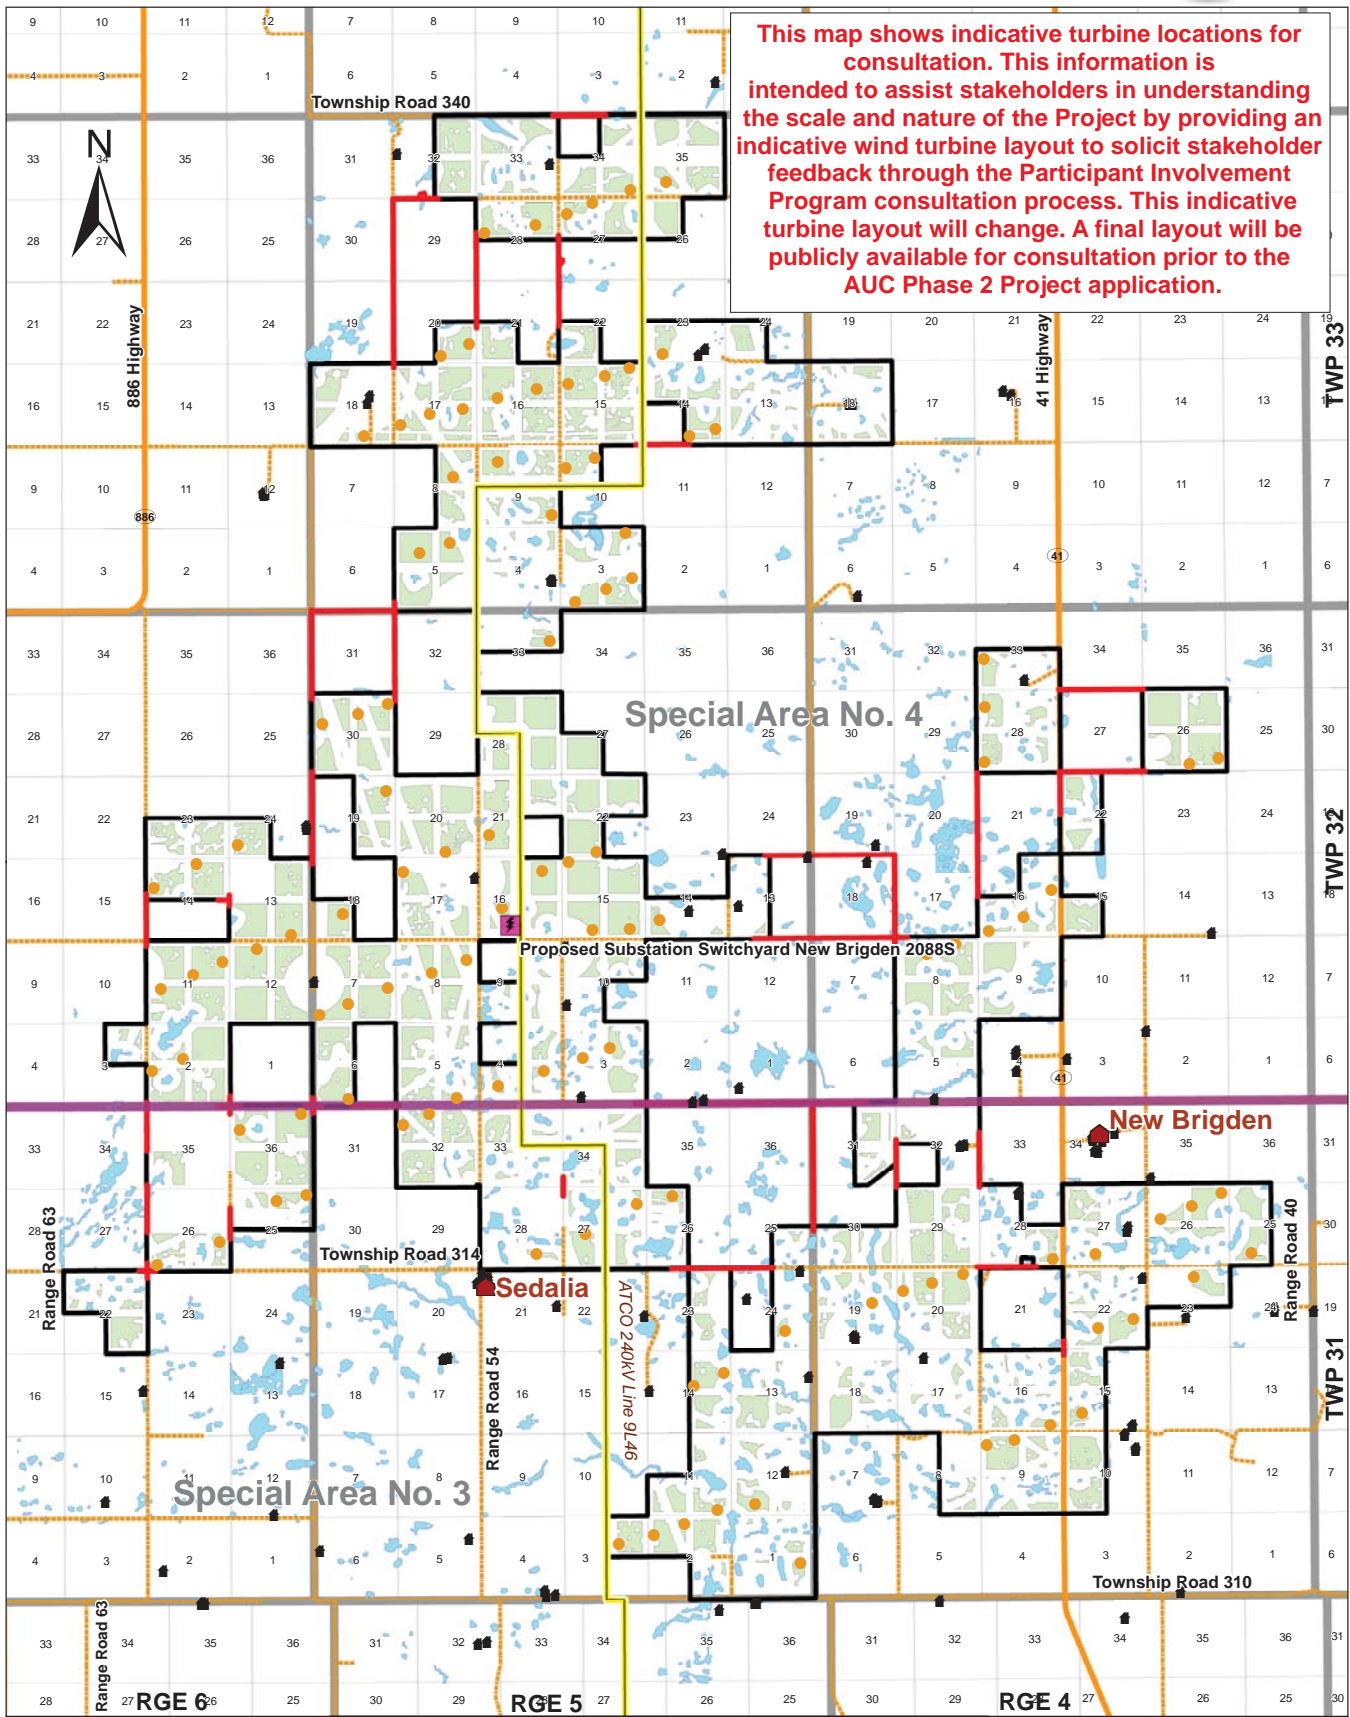

Kind regards,

A handwritten signature in black ink, appearing to read 'Ryan O'Connor'.

# SHARP HILLS WIND FARM

Proposed Turbine Buildable Area and Indicative Turbine Locations for up to 300MW

This map shows indicative turbine locations for consultation. This information is intended to assist stakeholders in understanding the scale and nature of the Project by providing an indicative wind turbine layout to solicit stakeholder feedback through the Participant Involvement Program consultation process. This indicative turbine layout will change. A final layout will be publicly available for consultation prior to the AUC Phase 2 Project application.

**Legend**

- Indicative Turbine Locations
- House
- Town
- Special Areas 3 & 4 Boundary
- Township Boundary
- Wetlands (Class 3-5)
- Project Boundary
- Project Boundary - Access Roads
- Proposed Buildable Area

**Roads**

- Numbered Highway
- Municipal Road

**Transmission and Substation**

- ATCO Electric Transmission Line 9L46
- Proposed Substation & Switchyard New Bridgen 2088S
